

CAPSTONE PROJECT

Yara, Maya, Ashneel

DEMO

YARA: frontend dev

Yara built the user interface – the HTML pages users see, the styling (CSS), and the interactivity (JavaScript). Basically make the app look good and respond to user clicks/inputs.

Created the Main Dashboard Template

Styled Everything

Made the UI Interactive

MAYA: AI & Embeddings Specialist

Maya built the AI brains of the app – the services that handle text extraction, vectorization, and semantic search. She also handles the core AI response generation using Google's Gemini API.

Implemented Document Text Extraction

Implemented Embeddings Service

Implemented AI Agent Service

ASHNEEL: Backend Developer

Ashneel built the backend – the Flask routes (endpoints) that handle HTTP requests from the frontend. He connects the frontend to the database and AI services.

Implemented the Upload Route

Implemented the Delete Route

Implemented the Chat and Settings Route

THANK YOU!
